duckly build up the health run down by worry, overwork or any unusual drain on the system. One box of Dr. Williams' Pink Pills contains two weeks' treatment.

Mrs. F. H. Morse, of Whitehall, Mich., says: "For ten years I never knew a well day. The bre.k-down was gradual at first, growing more alarming and complicated as more alarming and complicated as the years went by. It would be difficult to tell all the various ail-ments I had. I was sick all over. I suffered intensely from stomach and intestinal trouble. My entire nervous system was completely prostrated. Natural sleep I did not prostrated. Natural sleep I did not know for years, existing only on the sleep procured by drugs. I was thin and exhausted and the doctors pronounced me incurable. There was a full feeling in my stomach and food distressed me. I seemed to get no benefit from the food that I at a I had a weak heart. I seemed to get no benefit from the food that I ate. I had a weak heart which fluttered badly. I also had headaches. I was so weak that I could hardly help myself. One day I decided to give Dr. Williams' Pink Pills a trial. I took the pills faithfully three times a day, also being careful to eat only good, nourishing food, exercise in the nourishing food, exercise in the open air and to go to bed regular-ly. At the end of three months I had gained surprisingly and at the end of six months I was well. I could sleep naturally and my stom-ach and head felt in a normal con-

She was held without bail.

Immediately following her arraignment, Mrs. Eaton, accompanied by two officers, stepped into a waiting automobile and started on the thirty-five mile ride to the Plymouth county jail, where she will await trial.

The admiral was poisoned. This was made certain when District Attorney Barker, immediately after the arrest,

Stubborn Colds May Lead to Consumption

Did you ever have a cold that would not let go; a cough that persisted, that prevented sleep and made waking hours miserable? Eckman's Alterative is the proper remedy in such cases. Perhaps some simple medicine may be effective where it is only a tickling in the throat; but when your ckest is sore and simple remedies don't answer—then take Eckman's Alterative. Neglect often leads to more serious trouble; a case in point follows:—

"Gentlemen: In July, 1905, I first noticed the conditions that showed I had Consumption. I lost weight rapidly; had a hollow cough, hemorrhages and very severe night sweats. My brother recommended Eckman's Alterative. In the fail of 1905, I began to take it. At this time I am perfectly well and robust. My appetite is good and my weight has increased from 110 to 140 pounds. Not a trace of my oid trouble remains. I will gladly express the merits of this medicine to anyone."

Two Kinds of Fallacy.

In a recent contribution to the letter box of the Herald on the subject of the tariff on shoes, Mr. Walter F. Creamer of Lynn presents two characteristics that are too often seen in these days among the critics and the makers of our laws-an adroit shifting of the burden of proof

and a loose use of facts and logic to make them fit a pet theory. In presenting his "proof positive that our shoe industry needs no protection,' Mr. Creamer calmly asks the advocates of protection why shoes should not be put on the free list. Of course that is putting the thing wrong end foremost. The burden of proof is properly on those who would make a change and take the continuance of the protective policy. The proper question is "why should the tariff be taken off shoes?" and not "why should shoes not be put on the free list?"

free list ?" There is a big difference. The "why not" method of voting and economic problems is all wrong and is full of danger. It is the product of a mentally phosphorescent era and it results in wild-eyed and half-baked legislation. The multiplicity and suggestions of laws thrust forward with nothing better than a "why not" in their behalf is due to the fact that a full answer to the "why not" usually involves a trip clear back to the beginnings of history and the dawn of reason-and few of us have

time for such a trip.

As to the figures presented by Mr.

Creamer to defend his position that the labor cost of our shoes is less than in Great Britain, it may be said that such a comparison is worse than valueless unless there is allowance for the grade and quality of the product. One great reason why the American shoe operative Stop the Pery Rehing Instantity
